PROFILE

- Dedicated game programmer with over 2 years of professional experience in game development.
- Passionate about playing and creating video games.
- Enjoy solving challenges and improving programming skills through hands-on game projects.
- I am interested in Multiplayer, animation systems, and building tools to improve development workflows.

EXPERIENCE

Game Programmer (Fulltime) Apr 2024 - Present

AutoVRse, Bangalore

I worked closely with designers and animators to expand existing game systems.
I also contributed to the multiplayer side of the game using Quantum 3 and Fusion 2.
Tempo Travelers **,** ***Gro***

Game Programmer (Intership) Jan 2024 – Mar 2024

AutoVRse, Bangalore

During my internship, I worked on implementing easy-to-use tools for designers and also helped improve game performance for Meta Quest 2.

Game Programmer (Remote Intership) Nov 2021

ZippyCreativeStudio

Contributed as a game programmer at ZippyCreative Studio, specializing in the development of hyper casual game projects and prototypes.

SKILLS

C++ and C#

Unity and VR

Unreal Engine 5

Version Control (Git and Plastic SCM)

PROECTS

Judgement Day
Judgement day is a psychological horror puzzle-adventure game.

- In this project, I implemented a player interaction system that allows players to pick up and inspect objects. I also developed an inventory system to store collected items.
- I worked extensively on the UI for both interaction and inventory systems.
- This project was developed with a team of 10 members, where I worked closely with game designers and animators.
  Steam Link

2D Plane Shooter
2D Plane Shooter game created using C++ and SDL2.

- Implemented Player movement, 2D collision Detection and Vectors using C++ and rendered using SDL2.
- I made my first video game using C++ and SDL2. I learned a lot of new things and had a great time doing it!
  Github Link

2D Multiplayer
2D Top-Down game made with unity using Photon Networking.

- Tried out multiplayer using photon networking (PUN). Explored features like Photon view, RPCs and more.
- Implemented game mechanics in unity and core programming (player controller/Enemy AI) with C# in unity engine.
